

Assignment 1 - Teacher Performance Brief

Chemistry Edexcel Nov 2026 | Corrections returned 9 July 2026

Assignment HW1	Due date Monday, 12:00 midnight	Class size 15 students	Papers marked 12
-------------------	---------------------------------------	---------------------------	---------------------

87%	87%	100%	80%
Class average	Median score	Pass rate	Submission rate

What the teacher needs to know

Reteach first

Periodic Table Structure is the weakest topic at 56% mastery. Begin with Question 1 and particle diagrams for elements, compounds and mixtures.

Main reason marks were lost

72% of lost marks were caused by missing keywords. Use a short mark-scheme keyword drill before the next assignment.

Immediate intervention

3 students did not submit. Follow up within 48 hours and give one clear catch-up deadline.

Positive signal

11 of 12 submitted students scored 80% or higher. Targeted reteaching is enough; full-topic repetition is unnecessary.

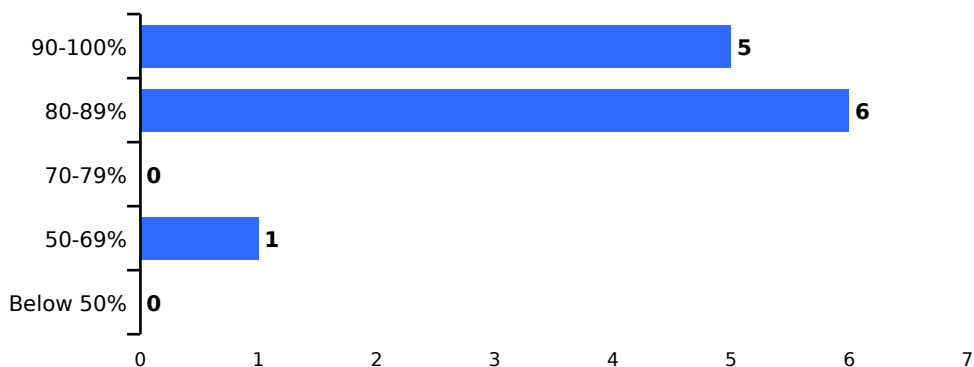

Recommended next lesson

1	5 min - Particle-diagram retrieval warm-up
2	10 min - Model Question 1 and compare common wrong answers
3	5 min - Keyword-matching drill using the mark scheme
4	5 min - Five-question exit ticket on Periodic Table Structure

Class Analytics

Score spread, topic mastery and the main causes of lost marks.

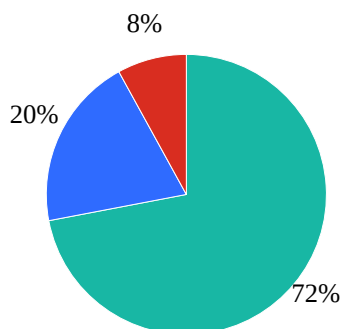

Grade distribution

Topic mastery

Topic	Mastery	Priority
Periodic Table Structure	56%	Urgent
Electronic Structure	60%	High
Particle Diagrams	61%	High
Periodic Table	69%	High
Classification of Matter	74%	Monitor
Metal Properties	75%	Secure
Properties of Metals	78%	Secure
States of Matter	79%	Secure

Why marks were lost

Missing keywords	72%
Method marks	20%
Calculation mistakes	8%

Questions and Student Follow-up

Only the items that require action are included.

Questions to review

Question	Class issue	Teacher response
Q1	0% correct overall	Reteach how particle diagrams represent elements, compounds and mixtures.
Q1.1	Elements confused with compounds or mixtures	Use a sorting example and require students to justify each choice.
Q1.4-Q1.5	Pure compounds confused with mixtures	Contrast D and G, then ask students to identify single atoms and multi-element molecules.
Q12	Malleable and ductile confused	Use one visual example for sheets and one for wires.
Q2	Water molecule shape misunderstood	Reinforce the bent V shape and distinguish elemental molecules from compounds.
Q4-T2-Extra	Instruction not fully followed	Train students to underline every command word before answering.
Q5-Q3	Transition-block squares miscounted	Model the 4 rows x 10 squares method.

Student snapshot

Group	Students	Action
Top performers	Aseel Ahmed El-lithy 97% Lana Mohamed 95% Yassin Mohammed 94% Yousef Ghazy 92% Abdelrahman Anter 91%	Use as extension group; no intervention needed.
Needs support	Ahmad Abdulrahman 69% Yassmin Eita 80% Reem Hamdy Mostafa 83%	Check Question 1 misconceptions and keyword use.
Did not submit	Marwan Mahmoud Zake Assy Marwan Sale Mohamed Gabr	Contact within 48 hours and assign one catch-up deadline.

Follow-up checklist

1	Reteach Question 1 at the start of the next lesson.
2	Run a keyword-matching drill before the next written task.
3	Give a five-question retrieval quiz on Periodic Table Structure.
4	Follow up with all three non-submitters within 48 hours.
